Quantum.Silver for Pigs – Antimicrobial

Reg No: Act 29 GNR529/264869/130/859 (Corporate Services)

A new generation product, using the Quantum Dot technology to produce a natural silver product with micro-cidal effects, which aids in the treatment of infections:

1. Viral, Bacterial, Fungal and coccidial

Routine Treatment recommendations:

Packaging:

Solution: 1, 5 and 25 Liter

Premix: 5 kg buckets

Dosage: **Solution:** 1ml/kg body mass twice daily for 5- 7 days

Treatment: Dosatron 1,0% in drinking water for weaners for 5 days

Prevention: Dosatron 0,5% in drinking water for weaners for 5 days

Premix: 200g to **400g/ton** of final feed.

Sows:

1. Pre-farrow: In Feed 200g/ton for 5-7 days
2. Every 3-4 months: Herd treatment in-feed premix at 400g/ton for 7 days

Weaners:

1. Dosatron at 1%: from day 3 to 8 after weaning (treat for 5 days)
2. Dosatron or premix: after moving from weaners to grower house- treat for 7 days at 400g/ton or Dosatron at 1%

Growers:

1. In-feed medication: 200g – 400g/ton as and when necessary

Piglets:

1. Mix into porridge or milk replacer at 1% of total mix. I.e 10ml/liter
2. Treat piglets on day 1 with 1ml Quantum Silver per os (anti-coccidial)

Withdrawal period:

Due to the very nano- size of the silver particles, it is excreted quickly and therefore has no meat withdrawal period.

Side effects: There are no known side effects for Quantum.Silver. This product may be used together with antibiotics.
